This will have some decent graphics for user to relax
while we use this 3-4 seconds to capture room temperature.

We will show user room temperature and will ask him/her
to go ahed and start measuring your breath.

Screen 1:

●●●○○ ABC   01:12 PM

We are claibrating device!

Take some time to relax, before you start
measuring your breath!

Calibration done!

Room temperature is: 35 C.

Please place your chin on platform
relaze and breath normally.

Start Measuring your breath ›

For first version. We will just do Live streaming of breath in charts.
Changes should be reflected in charts will be delayed by 5 secs.

- Showing if Ida/Pingala is active. : once we have detected which nostril is active then we will highlight that chart

   · We will also have button which will take user to next step to show importance of Ida/Pingala being active.
   · We will have Ideal charts of Ida/Pingala

Screen 2:

●●●○○ ABC   01:12 PM

Your Left Nostril (Ida) is active!

Importance of Ida ›
